

Servo System for Precise Control

Alpha 7

- Range: 50 to 5000 watts
- Supply Voltage: 1 Phase 200V upto 750W and 3 Phase 220V from 1 KW to 5 KW
- Rated Speed: Upto 3000 RPM
- Brake Options: Available with Brake and Without Brake
- Speed and frequency response at 3.2kHz realizes ultra-high-speed control
- The maximum instantaneous torque of the servo motor is now as high as 350%. (This is applicable only to certain models.)
- The 24-bit fine resolution INC/ABS encoder significantly improves the precision of control Equipped as standard with STO.
